

MediKredit NAPPI Changes and Information

Circular Number: N003/2013
Circular Date: 13 February 2013
Effective Date: 25 February 2013

Important notice

Previously Section 21 NAPPI codes were allocated a pack size of 1 unit e.g. 1 tablet.

This created confusion in the industry for products where pack size was not 1 unit.

The NAPPI Advisory Board (NAB) has therefore agreed that the pack size be changed to the actual pack size of the product e.g. 30 tablets and that NAPPI codes for new Section 21 products be allocated a pack size that reflected the products' actual pack size.

During October 2011 the NAPPI suffix codes for most products were changed. The product below has not been updated at that time, and needs to be corrected.

The old NAPPI suffix code will be terminated and the new NAPPI suffix code will be released to live on 25 February 2013 with the same effective date as the old NAPPI suffix code.

SUPPLIER:	Allergan Pharmaceuticals (Pty) Ltd
CHANGED DATE:	25 February 2013
